Team Deliverable #2 - User Stories

Main Goal: As a user, I want to be able to create a Spotify playlist based on the weather in my location in order to have a better music selection.

Specific User Stories:

1. As a user, I want to be able to choose from suggested playlists without the need to generate my own in order to have quicker access to music
2. As a user, I want to be able to check the weather conditions and temperature in my area for today so that I can know the weather around me.
3. As a user, I want to be able to log into my account in order to see my previously made playlists.
4. As a user, I want to delete previously made playlists so that I do not clutter my account with old/unwanted playlists.
5. As a user, I want to be able to create a Spotify playlist for the weather in a different chosen location so that I can explore other areas and other music
